on the order confirmation with remaining 50%
being paid before order shipment

Warranty: Our limited warranty is valid for 3 years
covering parts and labor and excludes the tubes
which are covered separately by a tube
manufacturer for 45 days

Additional information

Front and rear panels are offered in standard **"Black Glossy"** color, but also can be custom painted using automotive lacquers, subject to an extra charge that will be quoted separately.

Chassis are offered in two standard colors **"Black Glossy"** and **"Dark Grey"**, but also can be custom painted using automotive lacquers, subject to an extra charge of 10% from the price of the product.

Customisation: Chassis of our amps are painted with the finest automotive lacquers, but it is an obligation of the dealer/distributor to provide us with the exact color code of specific car manufacturer, model and production year. The general rule is that the dealer distributor decided with final customer on the color choice and further provides us a specific color code of the car model and production year. This allows us to offer almost unlimited array of colors.

Speakers are offered in 2 standard colors "Black Matte and White Matte", but also can be custom painted subject to an extra charge of 15%. Nuda's frame comes with the high gloss "Piano Black" finish in a standard configuration and can be ordered in a variety of colors and veneers at an additional charge to be quoted separately.

Lead times: All our products are hand-crafted, built-to-order and customized to the buyers specifications. We usually require our lead time of 4-6 weeks for standard colors and 6-12 weeks for custom painted products, which includes a mandatory 2 week bench test. We provide specific lead time with Sales Order Confirmation.

Shipping packaging: Standard heavy duty cardboard with wooden frames packaging is included in the price. However, everything can be shipped in the custom-made flight cases at the additional cost.
